Subject: Microsoft Settlement

Dear DOJ,

The current DOJ settlement is a bad idea.
Microsoft needs real punishment!

I frequently use computer applications in my duties as an Electrical Engineer. Microsofts Windows software has not improved much through the years. I have witnessed through the use of Microsoft's software how manipulative and anti-competitive their products are.

The citizens of the U.S. need real software competition now. I am tired of losing control of my computer with each passing year.

thank you,
J. J. Ward
